

Maintenance, Attendance – New Remote Option for Period Attendance

Summary

A new option has been added to allow districts to configure period attendance screens to include a Remote column. This column can be used to indicate whether a student is present or absent for remote learning for that course on a given day.

Note: At this time, the “Remote” indicator for attendance entries is only available in the Audit Log in Maintenance. Additional enhancements will be available in the Version 18.2 release to provide districts with additional reporting on remote attendance entries.

Detail

A new “Allow Remote Attendance in Per Period” option has been added to **Maintenance > Attendance > Building School Level Attendance Options**. This option controls whether or not the new “Remote” checkbox column is available on period attendance screens and is set to “No” by default.

Attendance Screens

When this option is set to “Yes,” period attendance screens for courses in this building school level will now include an additional column for “Remote” to allow users to indicate whether a student is present or absent for remote learning on that day. This impacts teacher attendance screens as well as course attendance screens in **Attendance > Attendance**.

The “Remote” column presents a checkbox for each student. Use the checkbox in the header row to check or uncheck this box for all students in a single operation.
