Partner with a colleague: As you work through the questions and tasks below, you can compare the demo site to your own site. Also, don't forget to use your Help guide as a resource.

Working with Historical Data

Can you find historical data in the following locations? Yes/no Give a brief description or details that are helpful to know.		
Location:	Yes/No	Notes/description
As a link from the assessment tile	Yes	From the Home page select a **Star product tile** (or an **Assessments tile** if you use Star 360) → **Historical Extract**. Select the school(s), school year(s), product(s), benchmark, and date for projected score, then click Generate Extract. You can click on Refresh until you see that the extract has completed and has a link is available for it. The extract(s) you created will be available on this page for the next five days. Click on the extract link and select to save the ZIP (compressed) file; save it to the preferred location on your computer or network. The ZIP file can be opened natively by all supported desktop operating systems simply by double-clicking on it. It should open like a folder, and will contain one tab-delimited text file that is best viewed using spreadsheet software, such Microsoft Excel, or can be opened using a plain-text editor. **Tip: copy the file and paste in excel doc or similar spreadsheet** Help file: https://help.renaissance.com/SR/HistoricalX
In reports	Yes	**As a teacher user:** If staff is given permission, they can see scores from previous years From the Home page, go to **Product Administration**→**Define User Capabilities**→ **Edit Default** →choose school then click on **Teacher Capabilities**→scroll down to **View Student's Historical**

In the Record Book	NO	
On a dashboard	Yes	**Overview Dashboard** From the Hope page, click on Reading or Math Dashboard→Reading or Math Overview. In the sentence, *"I am viewing…choose class, group, or student you wish to view…for…choose **All Time**"* I am viewing all in Gr5 Class 1 at Tiger Elementary 360 ∨ for School Year ∨ **STAR Reading: Growth and Achievement** Cohort Comparison (median, by grade) School District National Scaled Score Compare in All-time School Year Marking Period Last 30 Days Last 7 Days

Star Assessments - Data

Working with Consolidated Reporting

Where can you access consolidated reports?	Click on Consolidated Reports from the Dashboards and Reporting tabs
How many consolidated report options are there?	9
Based on the description, how many reports have Star Assessment data? List these reports.	7 Assessment Proficiency Customizable Progress Customizable Ranking Customizable Status School-to-Home Star Summary State Performance-District
What is a reporting period? Briefly list tasks or steps for creating reporting periods.	Reporting periods are used to designate the time periods that you want to include on Consolidated Reports. Reporting periods are required before you consolidate data. Some reports are not available if you have only one reporting period, and some are not available if you do not have the necessary products. From the Home page, click on Consolidated Reports→View Reporting Periods→Add Reporting Periods On the Add Reporting Period page, type the reporting period name and short name in the appropriate blank fields. Please note that the short name appears on reports. To enter the start date, type the date or select the calendar button to choose the date. You can enter the end date as you did the start date, or you can choose to set the end date a set number of days, weeks, or months after the start date. To do this, type the number of days, weeks, or months in the

Star Assessments - Data

	blank "Set end date in" field. Then, use the drop-down list to choose Day(s), Week(s), or Month(s). Then, select Set. To save your reporting period and add another reporting period, select Save and Add. Then, repeat steps 4-6 above. To save your reporting period and exit this page, select Save. (To exit this page without saving the reporting period, select Cancel.) **Your new reporting periods will be available for reports the next time data is consolidated.**
What needs to happen to be able to have data available for Consolidated Reports? What are some important aspects to know?	Consolidated Reports will not be available if the data has never been consolidated or if a consolidation is in progress. This page will notify you if there is a reason why you cannot generate the reports. If no reporting periods exist and you are an administrator, this page will include an Add Reporting Period link; reporting periods are required before you consolidate data. Some reports are not available if you have only one reporting period, and some are not available if you do not have the necessary products. Consolidation gathers data from some products on your site for the district or schools. This information is then used when you generate Consolidated Reports. (The reports use the information from the most recent consolidation.) Click on **Schedule Consolidation** Enter the date when you want the next consolidation to occur, or select the calendar button to choose a date. Use the drop-down lists to choose the time of day for the next consolidation. Use the Recurrence drop-down list to choose whether consolidation should be repeated Daily, Weekly, Monthly, or None. Select Save. To leave this page without saving your changes, select Cancel.
